

Configure Connection to AI Resources

Last Modified on 03/11/2026 9:19 am EDT

Overview

Deduction supports various advanced models and tools (Open AI and DocIntel) for deduction processing. Before using the AI capabilities, you need to configure the connection to these AI resources.

You need to configure the configuration.yaml file.

Following is the sample YAML file:

```
kind: document
metadata:
  name: deduction/v1/documents/configuration
spec:
  configs:
    common:
      values:
        documentType:
          value: Invoice
        openAIUrl:
          value: https://werti-mbnpnyf-eastus2.openai.azure.com/openai/deployments/gpt-4o/chat/completions?api-version=2025-01-01-preview
        openAIKey:
          value: '%%deduction:secrets:openAIKey%%'
        docIntelUrl:
          value: https://doc-intel-or-latest-version.cognitiveservices.azure.com/documentintelligence/documentModels/prebuilt-layout:analyze?api-version=2024-11-30
        docIntelKey:
          value: '%%deduction:secrets:docIntelKey%%'
      emailBillbackTemplate:
        values:
          fromEmail:
            value: abc@genpact.com
          toEmail:
            value: xyz@genpact.com
          subjectPart1:
            value: This is IWFID number
          subjectPart2:
            value: This is the amount
```
